DETAILED ACTION

Status of Application, Amendments, And/Or Claims

The Decision on Appeal mailed 22 September 2005 is noted. Accordingly, all previous grounds of rejection are withdrawn.

In view of the new grounds of rejection set forth below, the finality of the previous Office Action is withdrawn and prosecution is hereby re-opened.

Applicant is advised that the copy of claim 25 appearing in the appendix to the Appeal Brief of 01 December 2003 is not identical to the official copy of claim 25, appearing in an amendment received 17 September 2002. Note parts (4) and (6) in particular.

Sequence Rules

The instant application is not fully in compliance with the sequence rules, 37 C.F.R. §§ 1.821-1.825, because each disclosure of a sequence encompassed by the definitions set forth in the rules is not accompanied by the required reference to a relevant sequence identifier (i.e., SEQ ID NO:). This occurs in claim 25.

35 U.S.C. § 112, Second Paragraph

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 25 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant

Art Unit: 1646

regards as the invention. Claim 25 (amended in the amendment received 17 September 2002) recites several amino acid sequences. In parts (1) and (2), dashes appear in the middle of the sequence. It is not clear if these dashes signify anything, such as an unusual peptide linkage, or if they are just typographical errors. In the absence of information regarding these dashes, the metes and bounds of the claim are not clear, and the claim is indefinite.

Conclusion

Claims 7-9 and 20-24 are allowable. Claim 25 is rejected.
